

FIRE & FLOOD RESTORATION

	<p>Water Damage Pre Clean Biological based initial treatment for water damage claims, especially black water. Digests odours and soils, including those from fecal mater and urine, into water and carbon dioxide. Uses spore strains and biobased cleaning technology specifically engineered for all water damage claims.</p>	WDP	4 L
	<p>Water Damage Post Clean Biological based post treatment for water damage claims, especially black water. Digests odours and soils, including those from fecal mater and urine, into water and carbon dioxide.</p>	WDPC	4 L
	<p>PRS Odour Control Biological based odour treatment for engineered specifically for many of the restoration industries toughest challenges including: protein fires, post-mortems and trauma, skunk, and urine. Digests odours and moderate soil loads into water and carbon dioxide using incredibly concentrated levels of spore strains which recognize and digest the organic odours at their source.</p>	BOC	4 L
	<p>Fuel Oil Cleaner Exceptional new biological based technology for the digestion and removal of soils and odours from fuel oil and other mid-weight hydrocarbons common to the restoration industry.</p>	FOC	4 L
	<p>Fire and Content Cleaner A remarkable new cleaning concept built specifically for fire residues and heavy duty content cleaning on hard surfaces.</p>	FCC	4 L
	<p>PRS Carpet Prespray Long-standing stains are physically released from the carpet while remaining bacteria prevent other soils from reappearing or wicking up. This chemistry offers new levels of stain removal and resistance in a truly environmentally compliant package.</p>	BCP	4 L
	<p>Chemical Sponge Chemical sponge are used to remove smoke and sut from surfaces after fires.</p>	CES00	EA
