

## INDUSTRIAL CHEMICALS

	<b>Low Strength Fragile and low-stress assemblies.</b>	Can be easily disassembled with normal tools.	LS306	250ml
	<b>Bio300 Parts Cleaner</b>	Bio300 is environmentally preferred parts cleaner. Can be applied undiluted by any of the commonly used degreasing methods. It can be used in parts washers, drip tanks or can be applied by spraying and wiping.	BIO300-20	20L
			B300	210L
	<b>Bag Filter</b>	Parts washer filtration system.	BAGFIL	2/PKG
	<b>Parts washer</b> - In addition to providing heavy-duty industrial cleaners we can assist with the parts washing in your facility. Oftentimes customers utilize contractors to remove and replace the part washing fluid on a regular basis. While this can certainly be convenient, it can result in overuse of fluid because the fluid is replaced whether it's cleaning efficacy has been exhausted or not.		N/S	
	<b>10" 10 Micron Filter</b>	Small parts washer filters.	SMFIL	6/PKG
