

# ENVIRO CHEM

## Enviro Chem is Green Housekeeping's Cornerstone.

In 1988, RML pioneered a new concept in the cleaning industry when they introduced Enviro Chem, a line of environmentally preferable high performance cleaning products. Enviro Chem cleaners and floor coatings are non-toxic, non-corrosive, non-combustible, and non-reactive. The cleaners contain no hazardous ingredients (OSHA), glycol ethers, petroleum distillates, nor suspected carcinogens or ozone-depleting compounds and are phosphate free. Today, the complete line of environmentally preferable cleaners and coatings are specifically designed to address health, safety, and environmental concerns and are the cornerstone of the RML Green Housekeeping Program. PH levels of all Enviro Chem products range between 4 and 10.
