

INDUSTRIAL CHEMICALS

Penetrating Lubricant

Deep penetrating natural lubricating oil.

PENLUBI

10 OZ

Reduce AI - Anti-Seize, Lubricating, Food Grade Product

Low Surface Tension. Infiltrates, penetrates, removes rust and oxidation, repels water, cleans effectively.

REDUCE

650ML X 12 NS

HT 600 - Anti Corrosion Specially formulated for parts subjected to bad weather.

Premium assembling and mounting paste. Ideal for equipment subjected to high temperatures and corrosive influences. Provides a durable protection against seizure, heat-freeze, galling, rust and oxidation. Suitable for bolts, nuts, headers flange, rollers, joints, gears... Will not harden over time. Extends life of outdoor and indoor installations.

HT600

650ML X 12 NS

High Resistance for Permanent Thread Locking

High Resistance. Permanent locking of threads which do normally not require to be disassembled. Very resistant to shocks and vibrations. Permits the sealing of tapped holes.

HR300

250 ML NS

Low Strength Thread Locking for Easy Disassembling

Low Strength Fragile and low-stress assemblies. Can be easily disassembled with normal tools.

LS306

250ml NS

Bio300 Parts Cleaner

Bio300 is environmentally preferred parts cleaner. Can be applied undiluted by any of the commonly used degreasing methods. It can be used in parts washers, drip tanks or can be applied by spraying and wiping.

BIO300-20

B300

210L

Bag Filter

Parts washer filtration system.

BAGFIL

2/PKG

Parts washer - In addition to providing heavy-duty industrial cleaners we can assist with the parts washing in your facility. Oftentimes customers utilize contractors to remove and replace the part washing fluid on a regular basis. While this can certainly be convenient, it can result in overuse of fluid because the fluid is replaced whether it's cleaning efficacy has been exhausted or not.

N/S

10" 10 Micron Filter

Small parts washer filters.
